

To Members of the Committee,

I am in support of HB-5363, An Act Concerning the Affordable Housing Land Use Appeals Procedure.

We are in need of these changes to 830-g and is long overdue to help our cities and towns with positive growth.

When the original Bill was put in place the HUE points were just too high and now it should be lowered to a level that it should have been at along with the other requested amendments that are needed and I am so glad that there is positive movement this year to get some of these done. Please help get this bill moved forward and PASSED because it is the right thing to do.

Thank you for your time and commitment.
